We Know Pools!

SWIMIN

Welcome

Spring 2010

Issue 14

Welcome again to "SWIMIN"!

There has been a lot of activity at The Pool Smith over the quieter winter months with all staff undertaking training. David has achieved his commercial pool operators qualification from the Royal Life Savers while both Geoff & Carol have become accredited specialists with the National Swimming Institute, Geoff in Domestic & Commercial pool servicing and Carol topped the nation in Water Analysis.

What this means is whether you use The Pool Smith for in-store or onsite service you are not only receiving advice & service from fully trained operators, but The Pool Smith is also QBSA licensed unlike the surrounding pool shops.

The Pool Smith can repair or install any piece of pool equipment legally, whilst still providing you with reassurance that your warranty is safe as well as the swimmers in your pool. September saw The Pool Smith exhibiting at the Courier Mail Spring Home Show and we have been able to continue our offers to our customers until the end of October.

Also **from the 25th September to the 3rd October buy 4 bags of salt and get 1 bag FREE!**

So drop in for your water test and jump into a bargain.

Eco-Easy Special

- Easy on Swimmers
- Easy on Electricity
- Easy On Water
- Easy on Chemicals
- Easy on Maintenance

- ☉ Waterco S600 Fibreglass Filter
- ☉ Noria FLO Glass Filter Media
- ☉ Waterco "Hydrotuf" 1.5hp Pump
- ☉ Waterco Multi-Cyclone
- ☉ "Water-King" Automatic Chlorinator
- ☉ Installation by BSA Licensed Company
- ☉ SPASA Eco-Pool Assessment & CPR Sign

RRP \$3350

SAVE \$950

\$2,400

WATERCO
Water, the liquid of life

Naturally Clear Ioniser

Naturally Clear has been designed to reduce chlorine, bromine & electricity usage to the absolute minimum. A saving of 70% can be expected in a typical installation. It produces positive ions of copper and silver in the pool or spa water. The copper ions are effective as an algacide and the silver ions are an effective bactericide

The advantages of fitting a Naturally Clear to your pool include:

- ☉ Reduced running time of your pool pump & filter
- ☉ Minimal chemical costs
- ☉ Cleaner swimming water
- ☉ No chlorine smells
- ☉ Kills Black Spot & Mustard Spot
- ☉ Increases pump life
- ☉ Kills Bacteria that's resistant to chlorine
- ☉ 3 year Warranty
- ☉ Designed & manufactured in Australia
- ☉ Inbuilt Timer, Clock & 10 day battery back up
- ☉ Variable output & manual override
- ☉ APVMA Perm it 61279

Carol's Choc Chip Biscuits

125g Butter or Margarine
 125g Castor Sugar
 1 Egg
 2 Cups Self Raising Flour
 1/2 Teaspoon Vanilla Essence
 Choc Chips (Cadbury's are good and have a variety of dark, milk or white chocolate)

Method:

1. Pre heat oven to moderate temperature.
2. Prepare baking tray using baking paper.
3. Cream butter and sugar and vanilla essence.
4. Add egg and beat well, until sugar has dissolved.
5. Add 1/2 sifted flour to make a soft dough.
6. Add choc chips and fold into dough.
 Tip: Don't use food processor for this. Instead transfer into bowl and mix by hand with mixing spoon.
7. Add enough flour to make a stiff dough.
 Tip: Until mixture leaves sides of bowl but before it breaks up into crumbs.
8. Using clean hands, roll teaspoons full of dough into balls and place in rows on prepared tray.
 Tip: Allow for cooking expansion when arranging on tray.
9. Lightly flatten balls with fork.
10. Bake in moderate oven until golden brown in colour.
11. Allow to cool slightly before transferring to cooling rack.
 When cool, biscuits will then become firm.
12. Store in airtight container.
13. Enjoy!

Tip: This recipe can be varied by replacing some of the flour with coco or by replacing the choc chips with nuts, diced pieces of dried apricots, mixed fruit, cherries, sultans or use your imagination but remember it is a sweet biscuit mixture.

Spring Trading Hours

Starting Saturday 25th September 2010

Monday to Friday	8:30am til 5pm
Saturday	8:30am til 1pm
Sunday & Public Holidays	CLOSED

Tom's Spring Pool Tips!

Q. Tom, how do I get rid of the Dust from my pool?

A. The Simple answer is filtration! Clean your filter and then add either Focus Water Polish or install a Waterco Multi-cyclone and let the filter run. If the dust is still there you will need to floc the pool. Drop into the shop and have us run through what's required.

Q. How often should I check the water in my pool?

A. Now that spring is here, the water in your pool will be warming up. This will increase the amount of chemicals required to keep your pool safe which means the chlorine needs to be increased for chlorine and salt water pools.

Q. What should I check first?

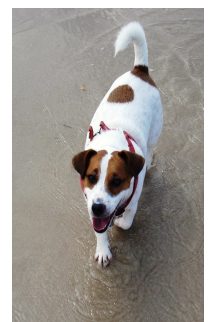

A. The pH is the most important reading for any pool or spa. If that is not kept at 7.4 for a cement pool, the sanitiser in your pool is not effective and usually algae will start to bloom.

Q. What is the most economical pool system to run?

A. An ionised pool requires less operating time than salt water or ozone pool. The silver particles released into the pool by the ioniser are not effected by exposure to the sun and use milliamps of power to release the silver and copper particles rather than amps required by a salt water chlorinator. The Salt water & chlorine pools suffer from exposure to the UV rays of the sun. Salt water pools need to be run for many hours in the summer months to keep the chlorine to the recommended level of 2ppm for a domestic pool or chlorine needs to be added to reduce the electricity demand. With an ozone system, the sanitiser in the pool exists only when the system is operating, which increases the consumption of electricity and becomes inefficient in times of power shortages or off peak electricity.

I also feel better when I swim in my ionised pool as I don't need to wash off the salt or chlorine residue when I have finished my swim.

I feel cool and refreshed!

Home Show Deals (Valid Until 30th October 2010)

Waterco S600 Fibreglass Filter Fully Installed with Focus Flo Glass Media (RRP \$1450)	\$1,100.00
Waterco Hydrotuf 150 Pool Pump Fully Installed (RRP \$880)	\$770.00
