Finalist 2008 SPASA Pool Shop of the Year

Finalist 2008 SPASA Pool Technician of the Year

SWIMIN

Winter 2008

Welcome

Issue 5

Welcome again to "SWIMIN". Since our last newsletter The Pool Smith has been nominated and selected as a finalist for the 2008 SPASA Pool Shop of the Year as well as Geoff becoming a Finalist for Pool Technician of the Year. The winners will be announced on the 12th July so we will let you know the results in our Spring Newsletter. Thank you to all of our customers who allowed SPASA to ring and talk with them. The other news is that the Brisbane City Council is ending their rebate of \$200 for pool blankets on the 30th June this year so anyone thinking about purchasing a blanket I urge you to do so by the 30th so you will be eligible for rebate.

Pool Heating

Now that the cold weather has arrived and pools are becoming unused we have a special on Compu Pools Compu-Heat pool heaters. The advantage of these heaters compared with heat pumps is the cost for example a Compu-Heat 18 which will do a 45,000l pool is on sale for \$2,200 plus fitting as opposed to a heat pump for the same pool which would be 3 times this price. So anyone who has been thinking about heating their pool let us give you a quote on these QLD made heaters so you can extend your swimming season and get more use out of your pool. Compu-Heat electric heaters incorporate the most advanced technology to provide lavish comfort, energy efficient operation and long lasting dependability. Each heater is complete with its own safety and control devices, and requires no other controls for safe operation.

- Fitted with two element supply contractors to stop heater damage if the first contactor welds its contacts.
- Highest quality elements with a protective coating against corrosion.
- Heater tank and thermostat pocket constructed of non-corrosive PVC with 50mm unions.
- Precise pool temperature setting dial.
- Fitted with safety flow pressure switch and over temperature reset.
- Ideal for connection to lower off peak electricity supply.

Winter Trading Hours

Monday to Friday	<u>8:30am til 4:30pm</u>
Saturday	<u>9am til 12pm</u>
Sunday	<u>CLOSED</u>
Public Holidays	<u>CLOSED</u>

Winterising your Pool!

It's that time of the year again to prepare your pool for winter. Follow these few steps through and it will make winterising your pool a piece of cake.

Step 1: Ensure your pool is Chemically balanced eg pH, Total Alkalinity & Chlorine.

Step 2: Ensure you remove all phosphates from your pool water throughout Autumn with Lo-Chlor Starver, as with the weather starting to cool off you'll find that your chlorine is more efficient and this added with Starver will help drop your phosphates quickly.

Step 3: Add an Algaecide to help minimize sanitiser usage! Follow these simple steps and it will make winterising your pool which we will cover in the Winter newsletter a lot easier on both you and your hip pocket.

The Pool Smith are pleased to be the dealers for Underwater Sound Australia. Using the technology offered by Underwater Sound Australia we can allow you to listen to your favourite tunes while swimming in your backyard pool. This system is being used in the synchronised swimming in the Beijing Olympics with it being the only system that can be used above & below the water. For more information please drop in or jump on our website and follow the link to Underwater Sound Australia at www.poolsmith.com.au

Colouring In Competition

Colour in the fish picture below and bring them in to be displayed in the shop! The Winner will win their choice of a Pool Toy from The Pool Smith! Runners up prizes as well!
